

Exporting Hi-Res PDFs from Adobe InDesign

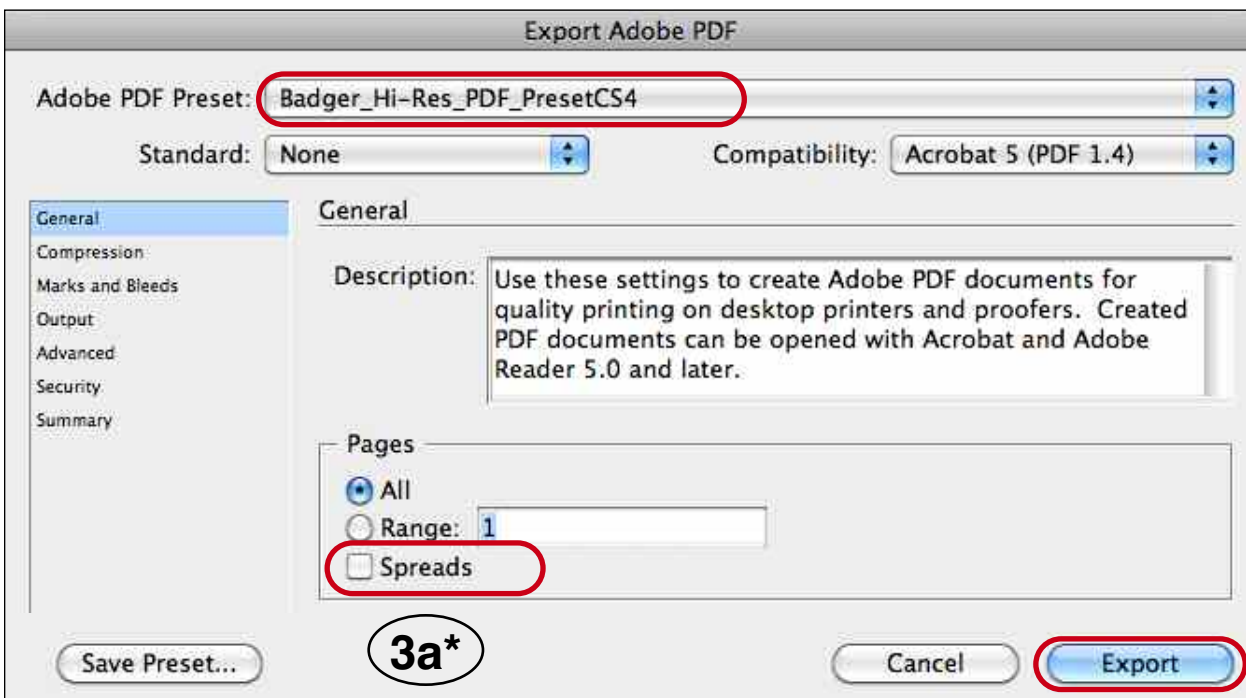

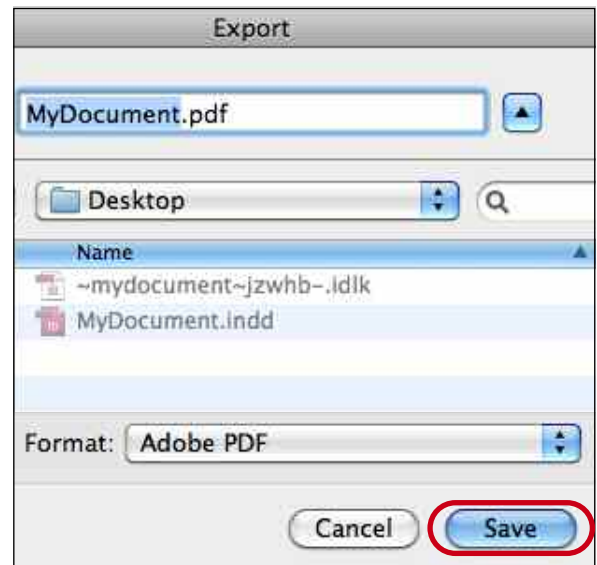

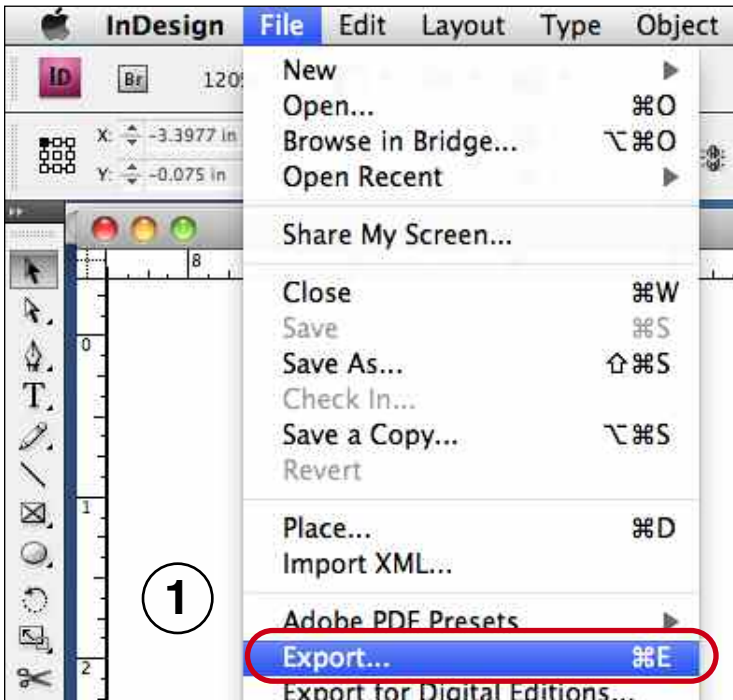

Before proceeding with these instructions, make sure you have downloaded and imported Badger's PDF Export preset. Instructions and settings can be downloaded from www.badgerprinting.com

Step 1: Select **Export...** from the File Menu.

Step 2: Name your document then press **Save**.

Step 3: Select **Badger_Hi-Res_PDF_PresetCS4** from the Adobe PDF Preset Menu.

Step 4: **Export**

* You should only check the Spreads option if your document needs to be output in spreads. An example might be a Pocket Folder that could be setup on two facing pages yet must print as one flat page.
