

Exporting Hi-Res PDFs from Quark Xpress

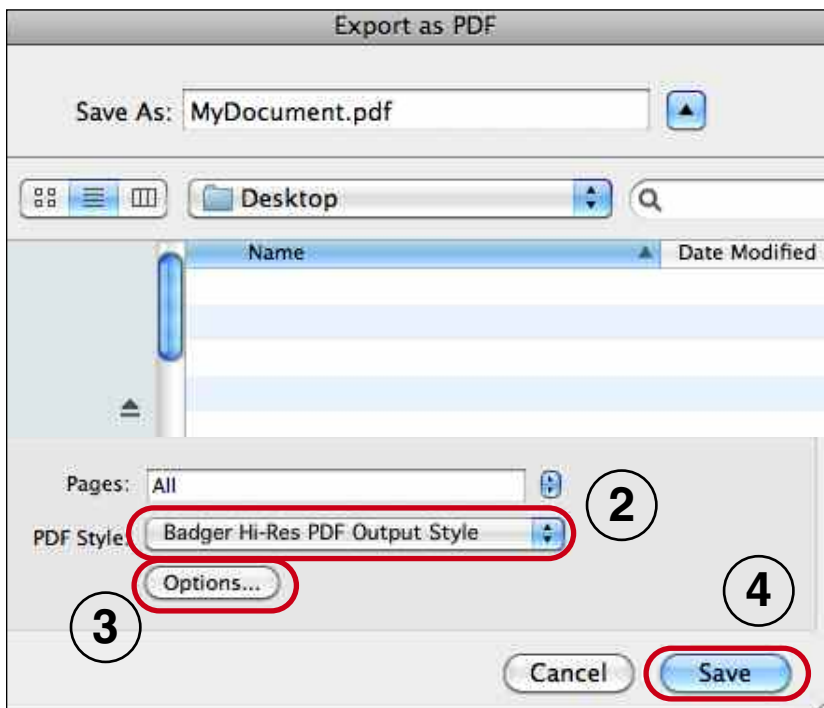

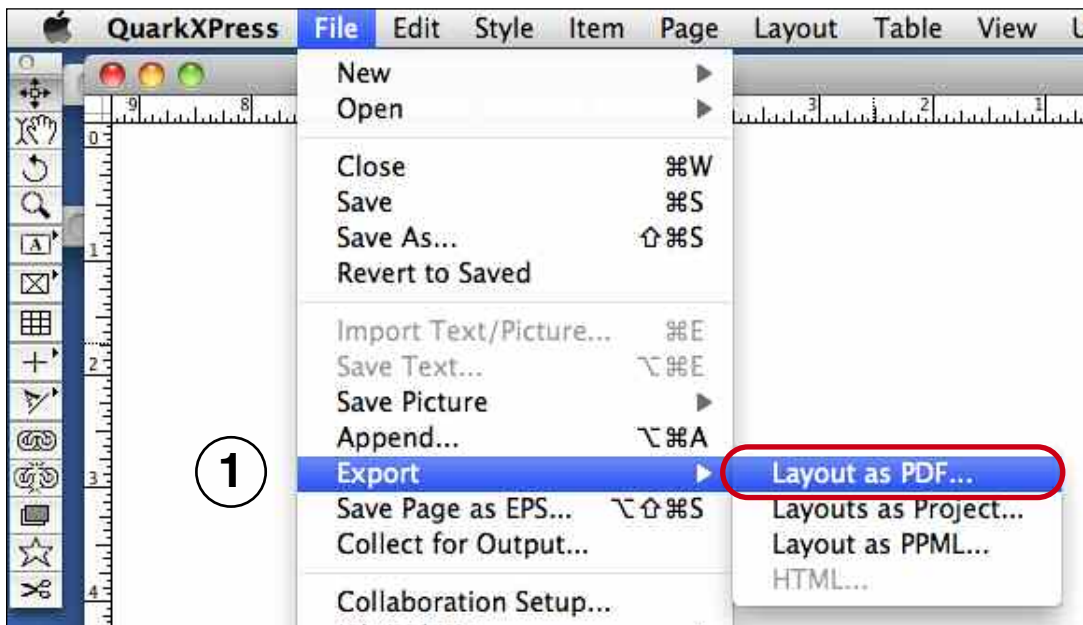

Before proceeding with these instructions, make sure you have downloaded and imported Badger's PDF Output style. Instructions and settings can be downloaded from www.badgerprinting.com

Step 1: Select **Export > Layout as PDF...** from the File Menu.

Step 2: Choose **Badger Hi-Res PDF Output Style** from the PDF Style menu.

Step 3: Press the **Options...** button to check the **Spreads** option if necessary*.

Step 4: **Save**

* You should only change this option (step 3) if your document needs to be output in spreads. An example might be a Pocket Folder that could be setup on two facing pages yet must print as one flat page.
